

Lab Technician: Pakrasi Lab

Full-time position available with emphasis on biochemistry and molecular biology techniques. Responsibilities include maintenance and handling of non-infectious photosynthetic bacterial cell cultures. Knowledge and adherence to sterile technique is a requirement. Additional duties include preparation of culture media and solutions, routine lab chores, and directed research work as assigned.

Qualifications: This is an entry-level position appropriate for a recent graduate seeking 1-2 years of laboratory experience, or for a person with some experience interested in acquiring additional skills. Understanding of basic laboratory techniques and desire to participate in biological research are required. Ability to work and participate in a lab group setting and handle concurrent tasks is necessary.

Starting salary commensurate with experience. For more information, contact geren@wustl.edu.
