A better screening tool for HIV-associated neurocognitive disorders: is it what clinicians need?
AIDS. 2014 Oct 3.

Unrecognized preclinical Alzheimer disease confounds rs-fcMRI studies of normal aging.

Brain morphometric correlates of metabolic variables in HIV: the CHARTER study.

Functional connectivity in autosomal dominant and late-onset Alzheimer disease.
JAMA Neurol. 2014 Sep 1;71(9):1111-22

Weighted brain networks in disease: centrality and entropy in human immunodeficiency virus and aging.
Thomas JB, Brier MR, Ortega M, Benzinger TL, Ances BM.

Impact of human immunodeficiency virus on neurocognition and risky behaviors in young adults.
Baker LM, Paul RH, Heaps JM, Westerhaus E, Chang JY, Williams S, Brier MR, Plax K, Ances BM.
The effect of APOE ε4 allele on cholinesterase inhibitors in patients with Alzheimer disease: evaluation of the feasibility of resting state functional connectivity magnetic resonance imaging.

The effect of APOE ε4 allele on cholinesterase inhibitors in patients with Alzheimer disease: evaluation of the feasibility of resting state functional connectivity magnetic resonance imaging.
Role of HIV in amyloid metabolism.
Ortega M, Ances BM.

Network dysfunction in Alzheimer's disease: refining the disconnection hypothesis.
Brier MR, Thomas JB, Ances BM.

Role of neuroimaging in HIV-associated neurocognitive disorders.
Masters MC, Ances BM.

Diagnosis and evaluation of a patient with rapidly progressive dementia.
Bucelli RC, Ances BM.

Advances in diagnostic testing for Alzheimer disease.
Schindler SE, McConathy J, Ances BM, Diamond MI.

Functional connectivity and graph theory in preclinical Alzheimer's disease.

Regional variability of imaging biomarkers in autosomal dominant Alzheimer's disease.

Allodynia and descending pain modulation in migraine: a resting state functional connectivity analysis.
Schwedt TJ, Larson-Prior L, Coalson RS, Nolan T, Mar S, Ances BM, Benzinger T, Schlaggar BL.

HIV-associated neurocognitive disorder.
Clifford DB, Ances BM.
Identifying risk factors for HIV-associated neurocognitive disorders using the international HIV dementia scale.

HIV clades B and C are associated with reduced brain volumetrics.

Impaired and facilitated functional networks in temporal lobe epilepsy.

Relationship between Stroop performance and resting state functional connectivity in cognitively normal older adults.

Neurologic complications of HIV infection: highlights from the 2013 Conference on Retroviruses and Opportunistic Infections.

Cerebrospinal fluid Aβ42, phosphorylated Tau181, and resting-state functional connectivity.

Impaired default network functional connectivity in autosomal dominant Alzheimer disease.

Susac syndrome in a patient with human immunodeficiency virus infection.

Tumefactive demyelination in a patient with human immunodeficiency virus.
Comparison of regional cerebral blood flow responses to hypoglycemia using pulsed arterial spin labeling and positron emission tomography.
Arbeláez AM, Su Y, Thomas JB, Hauch AC, Hershey T, Ances BM.

Pathways to neurodegeneration: effects of HIV and aging on resting-state functional connectivity.
Thomas JB, Brier MR, Snyder AZ, Vaida FF, Ances BM.

The Alzheimer's disease-8 and Montreal Cognitive Assessment as screening tools for neurocognitive impairment in HIV-infected persons.
Overton ET, Azad TD, Parker N, Demarco Shaw D, Frain J, Spitz T, Westerhaus E, Paul R, Clifford DB, Ances BM.

Coupling of cerebral blood flow and oxygen metabolism is conserved for chromatic and luminance stimuli in human visual cortex.
Leontiev O, Buracas GT, Liang C, Ances BM, Perthen JE, Shmuel A, Buxton RB.
