Nature Reserve Intern

Forest Park Forever is seeking a Nature Reserve Intern for a summer position in land management and restoration. The Intern will assist the Nature Reserve Foreman in day-to-day management activities. Major responsibilities will include native species identification and exotic species control to restore ecosystem function and structure within communities. Other projects may include bird surveys, wildlife surveys, and educational outings. The position is located primarily on the Nature Reserve in Forest Park; which consists of 120 acres of old growth forest, reconstructed savannah, and prairie habitat in the heart of downtown St Louis. The Intern will develop a working knowledge of Missouri flora, and gain experience in the creation and maintenance of high-quality natural communities in an urban setting.

Qualified applicants will be rising Juniors or Seniors with coursework in botany and land management; but position can be tailored to accommodate qualified applicants. Preferred work term is May to August, but starting and ending dates are flexible. Pay is competitive.

Forest Park Forever is a non-profit dedicated to working with the City of St Louis to make Forest Park one of the premier parks in the nation. More information on Forest Park Forever can be found at www.forestparkforever.org.

Please send cover letter, resume, and unofficial transcripts to Steven Buback (Nature Reserve Foreman) via email at sbuback@forestparkforever.org or regular mail at 5595 Grand Drive, St Louis MO 63112-1095.
